

Functional Pin Description

Pin No.	Pin Name	Pin Function
1	EN	Enable control input. Pull High to Enable.
2, 9 (Exposed Pad)	PGND	Power ground. The exposed pad must be soldered to a large PCB and connected to PGND for maximum power dissipation.
3	AGND	Analog ground. Should be electrically connected to GND close to the device.
4	FB	Feedback voltage input.
5	VOS	Output voltage sense pin for the internal control loop. Must be connected to output.
6	PGOOD	Power good open-drain output. This pin is pulled to low if the output voltage is below regulation limits. Can be left floating if not used.
7	LX	Switch node. The Source of the internal high-side power MOSFET, and Drain of the internal low-side (synchronous) rectifier MOSFET.
8	VIN	Power input supply voltage, 2.5V to 5.5V.
